Objective

Close to finishing a bachelor's degree in Physics and having an orientation for software engineering and data science I intend to deepen my skills in programming and am eager for an opportunity to start work in the field, to learn what it entails and to improve in whatever way I can. To that end I am available to start as soon as required.

Education

University of Coimbra, Bachelor's degree in Physics

Currently on my last year, I have completed several subjects related to programming (mostly Python) as well as mathematics.

Relevant modules:

Mathematical analysis 1-3

Computational Physics

Computation and programming

Communication

Fluent in both Portuguese and English I am comfortable with my communication skills, having experience in public speaking.
